Art Unit: 3611

1. Applicant's election of specie I (Fig. 3, claims 1-5, 9-14, 18-22 and 26-29 readable thereon) in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 3, 12, 20 and 29 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not disclose the structure that comprises a "weldment". It is noted that this term is mentioned at page 7, line 22, however, no explanation of the structure of this element is provided.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3, 12, 20 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3611

The structure of the "weldment" can not be determined, rendering these claims vague and indefinite.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5, 9-14, 18-22 and 26-29 are rejected under 35 U.S.C. 102(e) as being fully anticipated by Porubcansky et al.

8. Claims 1, 2, 3, 9, 18, 19, 20 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Petzold.

Petzold discloses a crawler vehicle having the structure as claimed. The vehicle includes tracks 16 and a drive assemblies 28 and weldments 22. The drive assemblies are depicted as being identical. As shown in fig. 1, the vehicle includes upper works and lower works.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goodwine, Helm et al., Morrow, Sr. et al., Eckert, Short et al. and Lykken et al. disclose various devices having features in common with the instant invention.

Art Unit: 3611
